Events Scheduler

New as of 01 Nov 10

Events added since 19 Oct 10

09 Dec 10

NSA IC WMAN/WLAN Conference Approximately 250 attendees from across the Intelligence Community will be attending the 2010 IC WMAN/WLAN (Intelligence Community Wireless Metropolitan Area Networks / Wireless Local Area Networks) Conference, and time has been set aside in the agenda on the day of the Tech Expo for all attendees to participate. FBC will be working with NSA to invite all NSA personnel and contractors to the expo as well.

Location: Fort Meade, MD

01 Feb 11

NSA FANX NSA conducts one of the U.S. Government`s leading research and development (R&D) programs. Some of the Agency`s R&D projects have significantly advanced the state of the art in the scientific and business worlds. This expo is supported by NSA`s Directorate of Acquisition`s Plans Policy and Outreach Office. NSA created an Acquisition Organization - an organization focused on working closely with U.S. industry - to help integrate technology forecasts and assess the rate of market implementation. NSA continues to broaden collaborative partnerships with industry and academia to maximize the return from technology efforts. These partnerships enable NSA to stay on the cutting edge of technology while allowing them to focus attention on two core missions: Foreign Signals Intelligence and Information Assurance. 06-09 Feb 11

NDSS Symposium 2011 Network security technologies must respond to ever more complex issues and malicious behaviors. The purpose of NDSS is to bring the global Internet community together to learn about and discuss cutting-edge advances in the science and application of network and distributed systems security. The three day program features refereed paper presentations, punctuated by selected invited talks on security as it is applied in the field.

Location: San Diego, CA

13-15 Feb 11

TechSec Solutions 2011 This conference is the IP-focused event where you form partnerships and find solutions. Whether you are an end user, integrator, installer, manufacturer or other security professional, TechSec brings you all together in an environment conducive to learning and integrating leading-edge technology. This conference on IP security technology offers an unparalleled schedule of speakers and forums in which to discuss the market's most pressing issues. In 2011, we discuss real world problems the end user community is experiencing on a regular basis and the solutions used to solve them.

Location: Delray Beach, FL

16 Mar 11

24th Annual FISSEA Expo This year's theme is "Bridging to the Future â€" Emerging Trends in Cybersecurity.â€" Through dual tracks of high quality presentations, 125-150 attendees will learn new ways to improve their IT security program and practical solutions to training problems while earning Continuing Professional Education (CPE) credits. The vendor fair gives attendees a tactical look at the products and services available to meet their professional goals. Conference attendees include information systems security professionals, trainers, developers, educators, managers, CIOs, academia, and researchers involved with information systems security awareness, training, education, certification, and professionalism. Last year's attendee list included individuals from: DoD, USDA, FDA, DISA, GAO, NOAA, Census, NRC, SSA, IRS, NIH, EPA, DOJ, Treasury, VA, SBA, DHS, NIST and HUD. In addition to the conference attendees, the expo will be open to all NIST employees.

Location: Gaithersburg, MD

DTIC 2011 The Defense Technical Information Center (DTIC), premier provider of information for the defense community, will host its 37th annual conference. The conference will address DTIC's role as the Department of Defense (DoD) technical information broker. Speakers from government, private industry, and DTIC will address evolving information technologies. The theme will be "DTIC: Your Authoritative Source of Defense Information for the Front Line and the Homeland." This conference will bring together information professionals from the science, technology, research and development, and

- 04-06 Apr 11** acquisition communities who create, disseminate and use DoD scientific, research, and engineering information. The conference will also feature a number of government and commercial exhibitors demonstrating and discussing the latest information services and technology.
Location: Alexandria, VA

- 05-09 Jun 11** **IEEE ICC 2011** [ICC 2011] Communication and Information Systems Security (CISS) Symposium. With the advent of pervasive computer applications and due to the proliferation of heterogeneous wired and wireless computer and communication networks, security, privacy and trust issues have become paramount. This Symposium will address all aspects of the modeling, design, implementation, deployment, and management of security algorithms, protocols, architectures, and systems. Furthermore, contributions devoted to the evaluation, optimization, or enhancement of security and privacy mechanisms for current technologies, as well as devising efficient security and privacy solutions for emerging areas from physical layer technology to the application layer, are solicited.
Location: Kyoto, FOR

-
- 04-06 Jul 11** **Safety and Security Engineering 2011** The success of the first three International Conferences on Safety and Security Engineering held in Rome in 2005, Malta in 2007 and Rome in 2009, has prompted the organisers to reconvene the meeting in 2011. The purpose of the conference is to provide a forum for the presentation and discussion of the most recent academic and industrial developments in the theoretical and practical aspects of safety and security engineering. This conference covers areas such as crisis management, security engineering, natural disasters and emergencies, terrorism, IT security, man-made hazards, risk management, control, protection and mitigation issues, and many others.

Complete Schedule as of 01 Nov 10

23 Aug 10-11 Mar
11

Information Operations (IO) Qualification Course FA30 This course develops FA 30 Officers to successfully serve their commands on staffs at brigade through corps level. Phase 1 is approximately 40 hrs of web based distance learning that you do at your own pace. Phase 2 is 7 months of IDT in a virtual classroom (from any internet connected computer). Phase 3 is a 15-day resident exercise held at FT Leavenworth KS in conjunction with an Active Duty FA30 course. The course is for Captains through Colonels who are assigned or will be assigned to FA 30 positions. During Phase 2 you will attend weekly four-hour classes using a web based application. You will be assigned to a student cohort with an instructor for Phase 2. These classes are conducted on weekday evenings. **WORKLOAD:** the course replicates the 12-week Active Duty FA 30 course. Therefore, it requires a significant time commitment. Once Phase 2 begins you should expect to commit time similar to an on-line Master's program including presentations, papers, readings, exercises, and tests.

LOCATION: Online after ATRRS Enrollment with an Internet Connection and Personnel Computer via a Learning Management System (LMS) located at FT Leavenworth. Your classroom is your living room, office or almost any location around the globe. **FOR MORE INFORMATION:** Contact the 3/124th IO School Courses Administrator (crsadmin1030@vt.ngb.army.mil)

Location: Online Course,

01-04 Nov 10

Cloud Expo The Only Enterprise IT Event in 2010 - Covering the Entire Scope of the Cloud Computing Spectrum. Cloud computing is steadily becoming an integral part of the enterprise computing environment. No one can take full advantage of cloud computing without first becoming familiar with the latest issues and trends, which is why the organizing principle of the 7th International Cloud Expo on November 1-4, 2010, is to ensure - through an intensive four-day schedule of keynotes, general and breakout sessions, and our bustling Expo Floor - that attending delegates leave the Santa Clara Convention Center with abundant resources, ideas and examples they can apply immediately to leveraging the Cloud, helping them to maximize performance, minimize cost and improve the scalability of their Enterprise IT endeavors. Delegates will leave 7th Cloud Expo with dramatically increased understanding of the entire scope of the cloud computing spectrum, from storage to security.

Location: Santa Clara, CA

SOFEX 10 Why Attend?

Special Operations Forces Symposium and Exposition (SOFEX) makes it easy for all attendees to get the latest information in SOF technology and industry updates; gives an excellent opportunity to spend quality time with each exhibitor, and receive all necessary information about different new products and services all in one place. Individuals who attend expositions attend to network. You, too, can look for new ideas, resources and contacts, and ask questions in conference sessions. SOFEX is a unique opportunity to obtain answers from experts as well as from professionals who have solved challenges like those you face.

Location: Fort Bragg, NC

For more information: <http://sofex.org/index.html>

Modeling and Simulation Conference Main Topic Areas:

Â· Identify appropriate opportunities to train with coalition partners in complex spectrum contested environments.

Â· Identify tools in the Live/Virtual/Constructive (LVC) constructs that will provide realistic and operationally representative training experiences with our coalition partners.

Â· Provide industry the opportunity to respond with effective LVC training solutions to the coalition warfighter.

- US Only Session:
Â· Identify challenges in training across all five domains in a contested environment with an emphasis on EW, Space and Cyber.
Â· Provide industry the opportunity to determine LVC training alternatives to respond to warfighting effects across all domains.
Location: Las Vegas, NV

- 02-05 Nov 10**
- ACM SenSys 2010** The 8th ACM Conference on Embedded Networked Sensor Systems (SenSys 2010) is a highly selective, single-track forum for the presentation of research results on systems issues in the area of embedded, networked sensors. Distributed systems based on networked sensors and actuators with embedded computation capabilities allow for an instrumentation of the physical world at an unprecedented scale and density, thus enabling a new generation of monitoring and control applications. SenSys provides a cross-disciplinary venue for researchers addressing the rich space of networked sensor system design issues to interact, present and exchange research results, and demonstrate their work in a hands-on research exhibition. We seek technical papers describing original, previously unpublished research results.
Location: Zurich, Switzerland

- IEEE HST '10 - Conference on Technologies for Homeland Security** The tenth annual IEEE Conference on Technologies for Homeland Security (IEEE HST '10) will focus on innovative technologies for deterring and preventing attacks, protecting critical infrastructure and individuals, and mitigating damage and expediting recovery. Submissions are desired in the broad areas of critical infrastructure and key resources protection (CIKR), border protection and monitoring, and disaster recovery and response, with application within about five years. This conference brings together innovators from leading universities, research laboratories, Homeland Security Centers of Excellence, small businesses, system integrators, and the end user community and provides a forum to discuss ideas, concepts, and experimental results. Stakeholders continue to include federal, state, local, tribal, and private sector organizations. This year we seek to broaden the conference to include input from our international partners.
Location: Waltham, MA

16 & 17 Nov 10 **Cloud Security Alliance Congress** Cloud computing represents the next major generation of computing, as information technology takes on the characteristics of an on-demand utility. The ability to innovate without the constraint of significant capital investments is unleashing a wave of new opportunities that promises to remake every business sector. While the massive changes underway are unstoppable, our collective responsibility to good governance, compliance, managing risks and serving our customers must remain. Security is consistently cited as the biggest inhibitor to more aggressive cloud adoption. With this in mind, we have created our first annual Cloud Security Alliance Congress, the industry's only conference devoted to the topic of cloud security. Our speakers' roster and confirmed attendees represent the key thought leaders and stakeholders shaping the future of cloud security, which is the future of the cloud itself.
Location: Orlando, FL

30 Nov 10

U.S. Cyber Command-Cyber Security Conference This first-time exposition will be in conjunction with the CYBERCOM Bi-Annual Conference. The conference and expo will be held for the first time at the Cyber Command's new location at Fort Meade, Maryland. Having just moved to Fort Meade, the Command will bring together 200-250 participants from the components which fall into CYBERCOM's umbrella for sessions and exhibits exemplifying the conference's theme, "Synchronize the DoD Efforts to Protect the Network." This is an excellent opportunity for leading cyber security companies to broaden their visibility within the Cyber Command and NSA. The exhibit area will be unclassified so exhibitors do not need to have clearances. The Conference is classified and exhibitors are not able to attend sessions as they are need-to-know.

Location: Fort Meade, MD

-
- 06-10 Dec 10** **2010 Annual Security Applications Conference ACSAC** has a tradition of bringing together security professionals from academia, government and industry who are interested in applied security. It is an internationally recognized forum where practitioners, researchers, and developers in information system security meet to learn and to exchange practical ideas and experiences. If you are developing practical solutions to problems relating to protecting commercial enterprises' or countries' information infrastructures, then you should consider submitting your work to ACSAC and attending in December. We provide in-depth tutorials on current security topics, workshops on hot topics, case studies on best practices, panels on controversial subjects and a technical track consisting of peer-reviewed papers. Late-breaking results are welcome and can be presented as a work-in-progress or as part of the poster session.
Location: Austin, TX

-
- 07 Dec 10** **Supply Chain Cyber Risk Forum** Cyber threats are changing our traditional perceptions and paradigms regarding supply chain risk management (SCRM). This half-day forum focuses on the evolving definition and reality of supply chain risk management in the ubiquitously connected world of today. The topic can be summarized in a statement from an essay by Deputy Secretary of Defense William Lynn that appeared in Foreign Affairs: "The risk of compromise in the manufacturing process is very real and is perhaps the least understood cyber threat." Supply chain reliance on information systems creates new vulnerabilities that challenge well-defined supply chain trust models through the introduction of interdependencies and complexities that are not well understood and are as dynamic as the technology.

Basic Intelligence Support to Cyber Conflict Course Course #204-11-FXVA-1 -----

10 Jan 11 The cyber/cyber intelligence issue is one of the most dynamic national security issues. Basic issues of doctrine and intelligence requirements are still being created and will continue to evolve over the next several years. Our cyber courses reflect and attempt to address these areas of change and uncertainty. The Basic one-day course is intended for individuals starting a career in the field or who are interested in separating the hype from the reality of intelligence in cyberspace. It introduces students to intelligence support to warfare conducted in cyberspace, and addresses computer network attack, defense and exploitation. This course covers the nature of cyberspace; understanding cyber attacks and adversaries in cyberspace; U.S. organizations; and the latest intelligence concepts to support computer network defense and offense. From indications & warning (I&W) and battle damage assessment (BDA), this course will give you your crucial first steps to understanding your role in cyber conflict. Please note that we offer two different levels of courses on cyber, both Basic and Advanced. Students should not register for both courses, rather should choose one based on their familiarity with the cyber issue.

Location: Fairfax, VA

13 Jan 11 **Missile Defense Agency** This one-day tabletop expo will be held at the Bradford Building for a third year. In mid 2011, the Missile Defense Agency (MDA) will begin the process to move its personnel from the Bradford Building to the new Von Braun complex at Redstone Arsenal. The Bradford Building has been the temporary home for MDA until the Von Braun Complex is ready. This is the perfect time to showcase your technologies and work them into the plans of this new building complex. The Von Braun Complex will feature 750,000 square feet of new office space, including SCIF's and other highly secure areas, administrative areas, secure data centers, a conference center & auditorium and a central energy plant for Uninterruptable Power Supplies (UPS). This event is proudly hosted by the Unified Communications (MDA/DXCT), CIO's Office. FBC will work with the host to promote the expo to all MDA personnel at this located. Last year's attendees included: Project Managers, Program Analysts, IT Project Managers, IT Specialists, IA Analysts, Project Specialists, and personnel from Logistics Management.

Location: Huntsville, AL

Cyber Crime Conference 2011 This conference focuses on all aspects of computer crime and incident response: intrusion investigations, cyber crime law, digital forensics, information assurance, as well as the research, development, testing, and evaluation of digital forensic tools. This is a Cyber Crime conference. This is not an Information Assurance conference; you won't hear presentations that you may have heard a year or two ago. Come hear and discuss new approaches and new perspectives with the current movers and shakers of the field. The goal is to prepare attendees for the new crimes of today and the near future. As this discipline approaches the future, facing technological demands in a rapidly changing world will be more important than ever before.

Location: Atlanta, GA

- 01 Feb 11 **NSA FANX** NSA conducts one of the U.S. Government's leading research and development (R&D) programs. Some of the Agency's R&D projects have significantly advanced the state of the art in the scientific and business worlds. This expo is supported by NSA's Directorate of Acquisition's Plans Policy and Outreach Office. NSA created an Acquisition Organization - an organization focused on working closely with U.S. industry - to help integrate technology forecasts and assess the rate of market implementation. NSA continues to broaden collaborative partnerships with industry and academia to maximize the return from technology efforts. These partnerships enable NSA to stay on the cutting edge of technology while allowing them to focus attention on two core missions: Foreign Signals Intelligence and Information Assurance. 28-30 Mar 11 **TCC 2011** The Theory of Cryptography Conference deals with the paradigms, approaches, and techniques used to conceptualize natural cryptographic problems and provide algorithmic solutions to them. More specifically, the scope of the conference includes, but is not limited to the:
-Study of known paradigms, approaches, and techniques, directed towards their better understanding and utilization,
-Discovery of new paradigms, approaches and techniques that overcome limitations of the existing ones,
-Formulation and treatment of new cryptographic problems,
-Study of notions of security and relations among them,
-Modeling and analysis of cryptographic algorithms, and
-Study of the complexity assumptions used in cryptography.

The Theory of Cryptography Conference is dedicated to the dissemination of results within its scope. The conference aims to provide a meeting place for researchers and to be instrumental in shaping the identity of the theoretical

EuroSys 2011 Conference The EuroSys conference series brings together professionals from academia and industry. It has a strong focus on systems research and development: operating systems, data base systems, real-time systems and middleware for networked, distributed, parallel, or embedded computing systems. EuroSys has become a premier forum for discussing various issues of systems software research and development, including implications related to hardware and applications. EuroSys 2011 will follow the pattern established by the previous EuroSys conferences, by seeking papers on all aspects of computer systems. EuroSys 2011 will also include a number of workshops to allow junior and senior members of the systems community to explore leading-edge topics and ideas before they are presented at a conference.

Location: Salzburg, Austria

11-15 Apr 11

6th Annual Department of Defense Enterprise Architecture Conference The conference focus is on how architecture delivers capability to the warfighter. Tutorials, workshops and breakout sessions will be themed to address: how architecture is delivering capability today in joint and coalition mission areas, what policy and governance initiatives are helping drive architecture across the enterprise, and what education, training and certification architects need to develop success-oriented competency and career paths that enable enterprise architect capabilities.

Location: Hampton, VA

19-21 Apr 11 **TACTICAL C4 CONFERENCE 2011** The Army's entire Tactical C4 community—including both active duty and reserve components—will benefit from this event. The conference is expected to be a mix of military, government civilians and vendors. This is a practical conference focusing on the tough, controversial issues the Army's Tactical Signal community is facing. Experts from across the Army will address various sides of each issue and an open dialogue will be encouraged. It is designed to be a forum for building solutions on key issues for the Army Tactical Signal community.
Location: College Park, GA

19-21 Apr 11 **InfoSec World Conference & Expo 2011** Keynote Presentations
-Cyber Security: How Has the Threat Changed, Why Can't the Government Get its Act Together - Roger W. Cressey, NBC Counterterrorism Analyst and Former Presidential Advisor
-Straight Talk on Security - Marcus J. Ranum, Chief of Security, Tenable Security, Inc.
-Protecting Your Secret Sauce With Testing that Really Matters - Chris Nickerson, CEO, Lares Consulting; featured member of TruTV's Tiger Team
Location: Orlando, FL

03-05 May 11 **Global INFOSEC Partnership Conference & Expo (GIPC)** GIPC is a mutually participative, one-of-a-kind conference that is supported by over 300 attendees annually. It covers a wide range of topics addressing current and future INFOSEC equipment acquisitions, policy and procedures, communications security, auditing, threat, and emerging protective technologies. Conference presentations and information sharing are achieved through workshops, lectures, hands-on opportunities, individual and small group discussions, and displays provided by government and industry.
Location: Fort Huachuca, AZ

08-10 May 11 **13th Workshop on Hot Topics in Operating Systems** Continuing the HotOS tradition, participants will present and discuss new ideas about computer systems research and how technological advances and new applications are shaping our computational infrastructure. To ensure a vigorous workshop environment, attendance is limited to a small number of participants who are active in the field.
Location: Napa, CA

21-28 May 11 **ICSE 2011** The International Conference on Software Engineering (ICSE) is the premier software engineering conference, providing a forum for researchers, practitioners and educators to present and discuss the most recent innovations, trends, experiences and concerns in the field of software engineering. The ICSE 2011 theme of Software by Design reflects the widely-held view that the most important ingredient in ensuring a software system's long-term success is its design. While other concepts, concerns, activities, artifacts, and processes are important to the success of a software engineering project, it is the quality of a system's design that provides the critical ingredient. Highlighting design as the conference's theme is meant to focus attention upon design's centrality, to encourage reflection on design experience, to inspire new designers, and to encourage development of new design techniques.
Location: Waikiki, Honolulu, HI

- 05-09 Jun 11** **IEEE ICC 2011** [ICC 2011] Communication and Information Systems Security (CISS) Symposium. With the advent of pervasive computer applications and due to the proliferation of heterogeneous wired and wireless computer and communication networks, security, privacy and trust issues have become paramount. This Symposium will address all aspects of the modeling, design, implementation, deployment, and management of security algorithms, protocols, architectures, and systems. Furthermore, contributions devoted to the evaluation, optimization, or enhancement of security and privacy mechanisms for current technologies, as well as devising efficient security and privacy solutions for emerging areas from physical layer technology to the application layer, are solicited.
Location: Kyoto, FOR

- 14-17 Jun 11** **WiSec '11** As wireless networks become ubiquitous, their security gains in importance. The ACM Conference on Wireless Network Security (WiSec) aims at exploring attacks on wireless networks as well as techniques to thwart them. The considered networks encompass cellular, metropolitan, local area, vehicular, ad hoc, satellite, underwater, cognitive radio, and sensor networks, as well as RFID.
Location: Hamburg, Germany

- 15-17 Jun 11** **Annual Technical Conference (USENIX ATC '11)** This conference has always been the place to present groundbreaking research and cutting-edge practices in a wide variety of technologies and environments. USENIX ATC '11 will be no exception. The Program Committee seeks high-quality submissions that further the knowledge and understanding of modern computing systems, with an emphasis on implementations and experimental results. We encourage papers that break new ground or present insightful results based on practical experience with computer systems.
Location: Portland, OR

- 04-06 Jul 11** **Safety and Security Engineering 2011** The success of the first three International Conferences on Safety and Security Engineering held in Rome in 2005, Malta in 2007 and Rome in 2009, has prompted the organisers to reconvene the meeting in 2011. The purpose of the conference is to provide a forum for the presentation and discussion of the most recent academic and industrial developments in the theoretical and practical aspects of safety and security engineering. This conference covers areas such as crisis management, security engineering, natural disasters and emergencies, terrorism, IT security, man-made hazards, risk management, control, protection and mitigation issues, and many others.

Location: Antwerp, FOR

Secrypt 2011 SECRIPT is part of ICETE, the International Joint Conference on e-Business and Telecommunications. Registration to SECRIPT allows free access to all other ICETE conferences. Conference Areas include:
â€° Data and Application Security and Privacy
â€° Access Control and Intrusion Detection
â€° Network Security and Protocols
â€° Cryptographic Techniques and Key Management
â€° Information Assurance
â€° Security in Information Systems and Software Engineering
Location: Seville, Spain

01-14 Aug 11

Unified Cross Domain Management Office (UCDMO) 2011 Conference Save the Date! The UCDMO is proud to announce our 5th Annual Conference to be held at the Hyatt Regency, Chicago Ill August 1 - 4, 2011. The UCDMO is a joint Department of Defense (DoD) and Intelligence Community (IC) organization with centralized coordination and oversight of all cross domain initiatives across both communities with goals of: optimizing capabilities, overseeing resources, mitigating risk and providing leadership. Our annual conference is a focal point for both communities to come together and dialogue with the UCDMO and each other, to work towards securing cross domain access and sharing of timely and trusted information for the Warfighter.
Location: Chicago, IL

14 & 15 Dec 11 **Emerging DoD Information Platforms** This conference will highlight new technologies DoD is adopting. These platforms will build better systems and provide software that is faster and cheaper to support the military services. DoD is adopting development platforms to provide enterprise capabilities in agile, innovative ways. From Google Earth to Amazon and Ozone to Forge.mil, these platforms will substantially change the DoD information environment. Attend this unique, original conference to learn about: How Forge.mil is changing application development and warfighter capability delivery, What the Services are doing in adopting Android, Stratus, Rainmaker, Google Earth, iPhone, Ozone and others, and Grass roots, edge user to Headquarters capability development and migration to name a few.
Location: Alexandria, VA
